

Speaking on the Environment

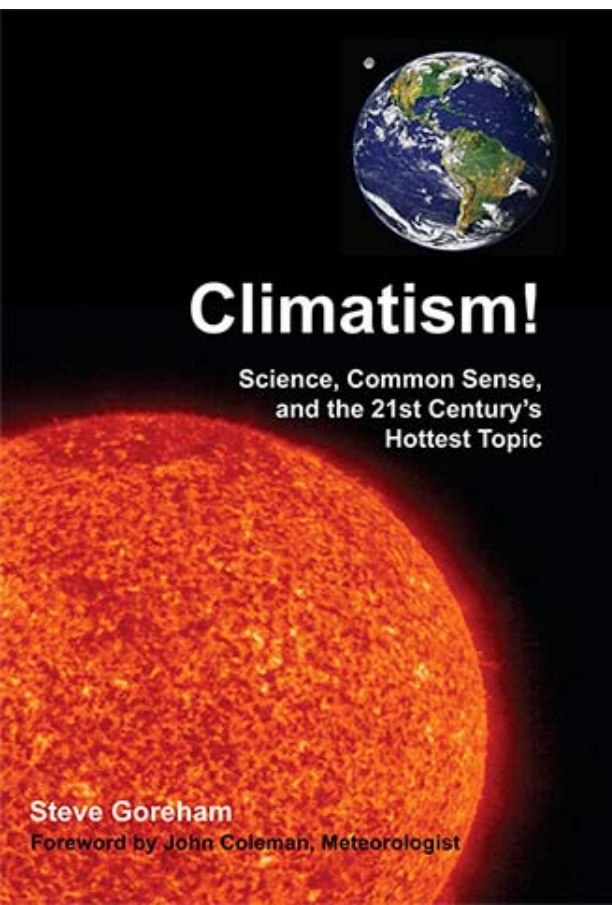

Common-Sense Environmental Policy for Business

Corporate America has gone green. Green products, sustainable services, recycling, energy efficiency programs, and counting of carbon emissions are standard practice. Efforts to use renewable energy and electric vehicles are accelerating. But are these policies necessary and effective? Steve Goreham delivers common sense on environmental issues for business. Learn the latest science and economics about global warming, pollution, biofuels, renewable energy, and other issues. Understand the basics of a common-sense environmental policy for your organization.

Learn the Elements of a Fact-Based Environmental Policy

Steve Goreham is an author, speaker, and researcher on environmental issues, as well as an engineer and a business executive with 30 years experience at Fortune 100 and private companies. He is the Executive Director of the *Climate Science Coalition of America*, a non-political association of scientists, engineers, and citizens dedicated to informing Americans about the realities of climate science and renewable energy economics. He is author of *Climatism! Science, Common Sense, and the 21st Century's Hottest Topic*. Steve holds a MBA from the University of Chicago and a MS in Electrical Engineering from the University of Illinois.
